ALLOWANCE

1. Claims 1-22 are pending in the present application.

Response to Arguments

2. Applicant's arguments, see Remarks (pages 11-13) filed on 03 November 2005, with respect to claims 1-22 have been fully considered and are persuasive. The rejection of these claims has been withdrawn.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Joseph Ragusa (Reg. No., 38,586) on 02 October 2006.

The application has been amended as follows:

Amend claim 13 as follows:

Line 11 delete "some" and add —one—

Allowable Subject Matter

4. The following is an examiner's statement of reasons for allowance:

The instant invention defines a computer trading system for trading fungible instruments. The computer trading system comprises a communication network, order input devices and broker nodes in communication with one another. The closest prior art, Silverman et al. U.S. Patent 6,260,025 teaches a computer trading system for trading fungible instruments comprising; a communication network for distributing electronic messages (column 4, lines 23-50); a plurality of order input devices connected to the communications network each for generating electronic order messages (column 4, lines 59 thru column 5, line 5); and a plurality of Broker nodes connected to the communications network, each Broker node arranged to provide market views, prescreened for credit, to trader terminals (column 6, lines 14-29), each Broker node comprising: a store of orders available for trading in the system; means for deriving a market view from the store of orders (column 8, lines 12-26); means for providing a market view from the store of orders (column 8, lines 12-26); means for providing the market view to at least one of the plurality of trader terminal (column 8, lines 12-62).

However, the prior art of record fails to teach a computer trading system for trading fungible instruments, comprising: a plurality of Broker nodes connected to the communications network, each Broker node arranged to perform a brokering function including matching orders and providing market views, prescreened for credit, to trader terminals, each Broker node comprising: means for deriving a market view from the store of orders; means for providing a market view from the store of orders; means for providing the market view to at least one of the plurality of trader terminals; and a matching facility for matching compatible orders submitted by the plurality of order input devices as discussed in pages 8-10 of the specification and page 13

of the amended specification (06 August 2002). These elements in combination with all of the other elements of the claims are not taught or fairly suggested in the prior art of record. For this reason claim 1 is deemed allowable over the prior art. Claims 7, 13, 19 and 20 are substantially similar to claim 1 and are allowed following the same reasoning. Claims 2-6, 8-12, 14-18, 21 and 22 are allowed for their dependency.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
